The homing instinct

The homing instinct is what makes certain animals, birds and fish return (0) the place they consider home. Cats often have this instinct. It was particularly strong in an American cat called Ninja, which disappeared shortly (9) its owners had taken it to their new home; a year later the cat turned up at its old home even (10) this was 1,360 kilometres away from (11) its owners were now living. Pigeons also have the homing instinct and, ever (14) ancient times, human beings have used them to carry messages back home. However, cat owners, (15) have to keep returning to their old address in (16) to bring their cat home, tend to find the homing instinct simply irritating rather than useful or interesting!
